

The Art of **COVERT HYPNOSIS**
SECRETS OF A MASTER HYPNOTIST REVEALED

NOW YOU TOO CAN HYPNOTIZE PEOPLE WITHOUT THEM KNOWING!

What is Covert Hypnosis?

During the course of a conversation, have you ever wished that you could reach into someone's mind and steer the conversation to convince them to think your way? If you work in sales, this would be a great tool to have wouldn't it?. By using covert hypnosis, you can indeed help others take your side. While doing this, the other person will temporarily be unaware that you are communicating with the subconscious mind.

This is simply the ability to communicate with a person's subconscious and not have them notice. Sometimes known

as conversational hypnosis, this is a process sometimes called "sleight of mouth". By using a combination of certain words, body language and gestures (such as pointing a certain way), the "hypnotist" will be able to influence the person's decision. Facial expressions also play a large role in this. For example, a properly timed frown will imply that the buyer is making a mistake. Think of used car salesmen using this technique to steer you to buy the car they are marketing. Using covert hypnosis is not a bad thing. You can guide people's decisions to make a purchase when they may have been on the fence before.

Have you ever gone through a moment where you've actually stood still, listening to someone talk to you in a melodious voice, and feel like you've been sent travelling in H.G.Wells' time machine, but in slow motion? Incredible isn't it? That voice could actually take you into another world, more like being put into a hypnotic trance. In fact, covert hypnosis is somewhat similar to what is said here. Who would have thought that the words flown out of our mouth had such hidden powers?

What's amazing about covert hypnosis is that the person being hypnotized has no idea that he or she is actually being hypnotized then and there. If you learn the techniques behind covert hypnosis, you will realize that it is rather difficult to pin point and say that a certain person is practicing this method on someone.

It is quite tempting to have an ability to secretly hypnotize anyone anytime. It is not as hard as you might think; let's take a look at one aspect on how to secretly hypnotize someone. In order to successfully hypnotize you target, first thing you must to do is to earn his or her trust. You can't successfully hypnotize anyone if the people you want to hypnotize don't trust you and feel comfortable around you.

He spent a lot of money purchasing other books on the subject of covert hypnosis, but none of them brought him any success. After reading 'The Art Of Covert Hypnosis', he was able to go out with confidence and pickup women. Another happy customer said that as a sales rep he has landed more accounts since reading this course. He is now the top salesman for the company that he works for and is making 3 times more than he used to. A different customer stated that she went to a job interview where the man interviewing her couldn't believe how powerful and persuasive she was. He decided to hire her after interviewing 17 other applicants.

Have you ever found yourself a little bit overwhelmed by another person's rhetoric? If you have ever been in a

situation where someone is talking and you can recall agreeing with them and being completely open to what they are saying? Later, you may be a little surprised to find that you agreed so heartily with them at the time or that you were so involved.

What might have happened was that covert hypnosis was being used on you. Some people are naturally adept at it and can chalk it up to charm or charisma, but the truth of the matter is that covert hypnosis is the process where one person can communicate with another person's subconscious mind in a subtle manner. There is no pocket watch or focus used, but instead, things like certain words, body language and intentional gestures are used to direct the person that the covert hypnosis is being used on to act or agree in a certain way.

In many ways, though, there is a highly concentrated and specific effect to the hypnosis that is being discussed. The truth of the matter is that with covert hypnosis, the person who is using covert hypnosis can convince their subject of a certain point of view by putting them into a highly suggestible trance state, all without them ever realizing that something is wrong or out of the ordinary. There is a good reason that this ability is known as sleight of mouth, due to the fact that there is a lot happening under the surface of your words without the other person being aware of it.

This 'Covert Hypnosis' course is actually 3 courses in one as

it trains you in all three disciplines of Hypnosis, NLP and Mentalism.

Steven Peliari, world famous master hypnotist and Chairman of the International Hypnosis Association reveals all the secrets you need to hypnotize others without them knowing for your own benefits and financial reward.
